

ENVIRONMENTAL POLICY

At ASGC Construction LLC we support our clients to enrich the social and physical environment through the provision of innovative and efficient infrastructure that underpins daily lives, supports communities and enables economic growth.

ASGC operations in the UAE implement a management system that meets the requirements of ISO14001:2015. Our activities impact and are impacted by the natural environment.

The minimum standard of the business is to meet our compliance obligations, whether these are legal requirements or obligations set by ASGC Group or our clients.

We will work closely with our employees, clients, partners, designers and supply chain to protect the environment by:

- Be an environmentally responsible neighbor in the communities where we operate, and act promptly and responsibly to correct incidents or conditions that endanger health, safety, or the environment. Report them to authorities promptly and inform affected parties as appropriate.
- The prevention of pollution with the implementation of environmentally friendlier technologies as well as construction methods.
- Reducing our local impacts and effects of noise, air quality, disturbance and inconvenience.
- Protecting biodiversity and ecosystems

We will ensure that life cycle principles are applied to the services and solutions we deliver to:

- Select materials that have a low environmental impact and are sourced responsibly
- Reduce waste and increase material recovery for re-use and recycling.
- Improving our energy efficiency
- Reducing our water use

We are committed to engaging with stakeholders to ensure we improve our environmental management system to deliver environmental and energy best practice.
